

Field Service Engineer (FSE)

Scientific Instruments Service (www.siservice.in), a company dealing in cutting edge laboratory equipment, urgently seeks a versatile service engineer to provide key technical (service and production) contributions to multiple products.

The engineer must be adaptable. Tasks will include:

- Learn the operation and troubleshooting of our analytical systems.
- Installation of analytical systems at customer's site.
- Troubleshoot customer's systems over phone and/or in person.
- Prepare service reports for customers.
- Support the technical goals of funded projects.
- Develop early prototypes with minimal resources.
- Assist in developing new peripheral tools and systems.

The position requires basic understanding of Physics and familiarity with Electronics and general Mechanics.

Laboratory experience, prior field service experience and pertinent background will be correlated to our needs.

Candidates with willingness to learn and commitment to completing tasks will be preferred.

Minimum education: Diploma in Electrical/Electronics/Mechanical Engineering.

Approximate Travel: 30%. Candidates unwilling to travel need not apply.

Location: Mumbai (South)/(Central)

Remuneration: Commensurate with education, skills and experience.
